

Directory Listings Checklist

DR Web Studio — citation building plan · July 2026

Use these exact values everywhere (copy-paste, never retype):

Name: · Phone: · Email:

Website: · Location:

Category:

⚠ First task: reconcile the street address expat.com publishes ("Manz 66 Casa 19...") with this posture — either adopt it everywhere or ask them to remove it. Consistency beats completeness.

Tier 1 — Map & search platforms (do these first)

Status	Platform	Where	Notes
HAVE	Google Business Profile	business.google.com	Verify primary category = "Website Designer" (#1 local ranking factor). Start collecting reviews steadily.
TO DO	Bing Places for Business	bingplaces.com	Free; offers one-click import from your GBP. Feeds Bing search + Copilot.
TO DO	Apple Business Connect	businessconnect.apple.com	Free; feeds Apple Maps & Siri. Most DR competitors skip it — easy differentiation.

Tier 2 — B2B / tech directories (what buyers & AI engines cite)

Status	Platform	Where	Notes
HAVE	Clutch	clutch.co/profile/dr-web-studio	Priority: get 2–3 client reviews on it. A reviewed profile ranks far better than an empty one.
TO DO	GoodFirms	goodfirms.co	Free listing; natural fit for a web dev agency.
TO DO	The Manifest	themanifest.com	Clutch's sister site — largely reuses your Clutch profile data.
TO DO	DesignRush	designrush.com	Free tier; ranks well for "web design agencies in [country]" searches.
TO DO	TechBehemoths	techbehemoths.com	Free; good country-level agency pages (Dominican Republic listing).
HAVE	Trustpilot	trustpilot.com/review/dr-webstudio.com	Same as Clutch: needs reviews to carry weight.
TO DO	Sortlist	sortlist.com	Free agency profile; strong in Europe/LatAm agency searches.

TO DO	Semrush Agency Partners	semrush.com/agencies	Free listing on a very high-authority domain.
TO DO	UpCity	upcity.com	Free tier US/international B2B directory.

Tier 3 — Dominican local directories (free citations)

Status	Platform	Where	Notes
TO DO	Páginas Amarillas RD	paginasamarillas.com.do	The canonical DR yellow pages.
TO DO	1411.com.do	1411.com.do	Large DR business directory (140k+ businesses).
TO DO	Yelu.do	yelu.do	Verified-business directory with Google Maps integration.
TO DO	Telefono.do	telefono.do	Free registration.
HAVE	expat.com	expat.com business directory	Live (listing #138346) — fix the street-address inconsistency (see box above).
TO DO	directoriodominicano.net	directoriodominicano.net	In progress per checklist owner.
TO DO	Infoguia RD	infoguia.com.do	Commercial guide for DR businesses and professionals.
TO DO	Livio.com	livio.com/Empresas	Long-running Dominican web portal with a business directory.

Tier 4 — Freelance marketplaces (rank for your hire-intent queries)

The SXO analysis found searches like "desarrollador web freelance república dominicana" are dominated by marketplace pages. A profile on these puts DR Web Studio *inside* pages that already rank — presence without having to outrank them.

Status	Platform	Where	Notes
TO DO	Workana	workana.com	The dominant LatAm freelance marketplace; ranks #1–2 for the ES hire queries.
TO DO	SoyFreelancer	soyfreelancer.com	LatAm-focused; also ranks for the ES hire queries.
TO DO	Upwork	upwork.com	Ranks for the EN hire queries; profile even if you don't bid — link it from the site.

Tier 5 — Entity anchors & portfolio platforms (AI-citation value)

Status	Platform	Where	Notes
--------	----------	-------	-------

TO DO	LinkedIn Company Page	linkedin.com/company/...	Already on the manual track — the single most-cited business profile type.
TO DO	Facebook Business Page	facebook.com/business	Dominant SMB discovery channel in the DR; enables FB reviews too.
TO DO	Instagram Business	instagram.com	Pair with Facebook; portfolio screenshots make easy content.
TO DO	Crunchbase	crunchbase.com	Free company profile; heavily cited by AI engines for company facts.
TO DO	Wikidata	wikidata.org	Machine-readable entity record (name, founder, HQ, website) — feeds Google's Knowledge Graph and LLMs. Create once site has a few independent citations.
TO DO	Behance / Dribbble	behance.net · dribbble.com	Design portfolio presence; each project links back to the client case study.
HAVE	GitHub	github.com/Karnes232	Personal profile links back to the site (done). Optional: an org account later.

After each listing goes live

- Add the new profile URL to **Sanity** → **General Layout** → **Social Links** so the site's Organization schema (sameAs) corroborates the citation — or hand the URLs to Claude to wire in.
- Keep a simple spreadsheet of listing URL + login + date created.
- Reviews cadence: aim for one new Google review every 2–3 weeks (steady beats bursts) — ask at project handoff, link directly to the GBP review form.
